DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-16 are pending.
2. The prior art submitted on 2/15/02 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-4, 9-12, and 17, are rejected under 35 U.S.C.102(e) as being anticipated by Meek et al. (6,366,927).

As per claims 1 and 9, Meek et al. disclose a vehicle navigation system that receives sensor data from a plurality of sensors, and provides a map image that is presented on a display, system comprising: a navigation map data memory that includes map data indicative of roadways stored in Cornu spiral form (see the abstract), and a navigation processing unit that receives the sensor data, and requests map data from navigation map data memory associated with the sensor data, and computes the map image from map data (see columns 1-2, lines 13-57).

As per claims 2 and 10, Meek et al. disclose map data includes data indicative of a unit Cornu spiral (see columns 5-6, lines 62-41; and columns 9-10, lines 20-28).

As per claims 3 and 11, Meek et al. disclose navigation processing unit computes map image using Cornu spiral polynomial coefficients stored in navigation map data memory (see columns 10-12, lines 29-63).

As per claims 4 and 12, Meek et al. disclose terms of polynomials of the unit Cornu spiral are stored in navigation map data memory and map image is computed using terms of polynomials of the unit Cornu spiral (see columns 4-5, lines 60-22).

Claim 17, is method claim corresponding to system claims 1, and 9 above. Therefore, it is rejected for the same rationales set forth as above.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5,7-8,13, and 15-16, are rejected under 35 U.S.C.103(a) as being unpatentable over Meek et al. (6,366,927) in view of Yamamoto et al. (6,438,494).

As per claims 5 and 13, Meek et al. do not disclose Taylor series. However, Yamamoto et al. disclose terms of polynomials are associated with Taylor series expressions indicative of Cornu spiral (see columns 1-5, lines 52-30; and columns 5-8, lines 60-56). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teach of Meek et al. by combining terms of polynomials are associated with Taylor series expressions indicative of Cornu spiral for accurately determine a Cornu spiral form of roadways and provide an accurate map image.

Art Unit: 3661

As per claims 7 and 15, Meek et al. disclose navigation map data memory includes coordinates of the unit Cornu spiral stored in a table, from which all the Cornu spirals of the navigation map are derived (see columns 5-8, lines 62-58).

As per claims 8 and 16, Meek et al. disclose navigation map data memory includes coordinates of the unit Cornu spirals stored in a table, from which all the Cornu spirals of the navigation map are derived for roads, railroad lines, rivers, lakes, and similar cartographic parameters defined as Cornu spirals (see columns 2-4, lines 57-52).

7. Claims 6, and 14, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

. Meek et al. (6,029,173)

. Okada (6,268,825)

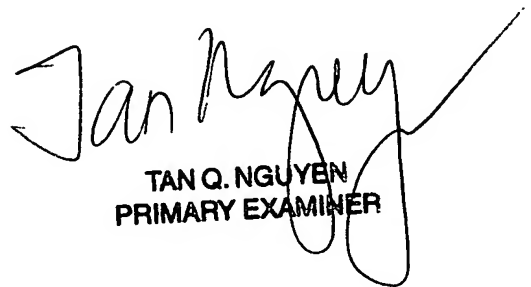

. Kamiya (6,304,818)
